

Conexo

CONEXO

Company Overview: Consulting - Leadership - Strategic Planning

web site: www.conexo.com

Location: Santa Clara, CA

Industry: Consulting

NetDocuments Usage: Document Management, Collaboration

Software switched from: File Directory

CHALLENGE

- Online, global access to our documents.
- High standards of security control and safety to clients and partners.
- Business Continuity.

SOLUTION

- "We have relied on NetDocuments from the beginning to provide safe, accessible storage for our own assets, so that we could work seamlessly between San Jose and our condo on the beach in Kauai."
- "We have utilized NetDocuments as our program management solution. Since our telecom client teams spanned the white space between big company firewalls the NetBinders for collaboration have been gold!"
- "We use NetDocuments to ensure business and sales continuity for ourselves, and to offer a best-in-class solution where documents are extremely confidential but still must be shared by cross-business or widely scattered teams."

RESULTS

- "In a world where small, fast-moving, specialized companies like Conexo are going to spring up all over, especially as the boomers retire, NetDocuments continues to be an entrepreneur's dream, the perfect solution for serious document safety, with access to anyone, anytime, anywhere."
- "Throughout our long association, we have appreciated the supportive and responsive relationship they have maintained with us, although we are very small and outside their target market space - and a long way from Utah. We have never met anyone from NetDocuments in person, but they have been on our virtual staff from the beginning."
