**Location:** Sunrise, FL  
**Industry:** Financial  
**NetDocuments Usage:** Document Management  
**Software switched from:**

### CHALLENGE

- HIPPA compliancy
- The ability to share documents and access our documents anytime, anywhere while not taking up space on our company hard drives.

### SOLUTION

- "The fact that NetDocuments is HIPPA compliant was a great relief not to have to worry about it."
- "The pricing structure was another positive feature that helped with our decision. We looked at a number of different options, but if you measure the costs in terms of the volume of data, it is much more cost effective to use NetDocuments. This made a huge difference in our choice to go with NetDocuments. We are not a huge operation and most of the enterprise scaled solutions out there are just totally out of our price range."

### RESULTS

- "NetDocuments has helped tremendously in that we can all access documents across the board. I have been out on appointments with clients at their offices and they have asked me for stuff. All I have to say is 'get me on a computer and I will pull them up right away'."
- "We've used NetDocumens (ND) for years, and have found their online document storage to be the most versatile in the industry."
- "Great to see them paired up with Salesforce.com."
- "NetDocuments offers consulting on customizing the service. The interface of NetDocuments with it's continued updates have been fantastic."
